What do you like best about this course?

These comments are intended for all instructors.

Comments
I really love the coding process in this course; he opened my eyes to how funny coding is and how helpful it is in the supply chain.
What I liked best about this course was the opportunity to learn how to use tools such as Google Colab and understand how technology can make demand planning work more efficient. It was helpful to see how these tools can be used to perform calculations, analyze data, and support decision–making in a practical business setting.
The passion the instructor has.
It was very modern and he showed us his true life experiences in supply chain.
I like the professor demostrates how to use AI.

In what ways, if any, has this course or the instructor Chenhao Zhou encouraged your intellectual growth and progress?

These comments are unique to the instructor Chenhao Zhou.

Comments
He encouraged my intellectual growth and progress and was very helpful in doing so. I would retake his class 100%
Professor Chenhao Zhou encouraged my intellectual growth by providing clear, well–organized course materials that made complex demand planning concepts much easier to understand. The resources, examples, and explanations helped me not only grasp the material for the course, but also understand how demand planning can be applied in real business situations. Even though I have now graduated, the course has motivated me to continue learning more about demand planning and strengthening my knowledge in the field as I move forward in my career.
He is well informed in generative AI's and blends it with the class material. Great insights to prepare for the future.
Professor understands what it's like to be a college student and showed us different ways to prepare for the course. Also he was very knowledgeable in supply chain. He was enthusiastic with every class lecture.
Excellent profssor overall, I highly recommend him.
